PREFACE

This grammar, of which the present volume is the first in a series of four, is a practical working text-book for pupils of elementary-school grade. It provides a wealth of exercises arranged in logical sequence such as to make the mastery of grammar comparatively easy and the demands on the teacher relatively light. The inductive method is inherent; both teacher and pupil are forced to this form of reasoning by the method of presentation and the very nature and order of the exercises.

The inductive method takes the form of asking the pupil to *observe* a number of particular instances illustrating the topic, to *note* the generalization based on these instances, and to *apply* the generalization to exercises, an example of which is given when deemed advisable.

It is assumed that the teacher knows how to teach, how to present new matter, how to review and to drill, and how to teach pupils to study. Her chief need is a liberal supply of material. In this series exercises are given in profusion, and the space on the page is used to the maximum consistent with artistic typography. No teacher, however, should be appalled by the quantity of material offered. She may not use it all, but it is here if she wants it. A striking feature is that most of it lends itself readily for use in the study period, group work, and homework.

Definitions and rules are given in matters essential only. These may be memorized as the work proceeds; for the convenience of the student they are collated at the end of the volume. Rigid

classification is avoided designedly and for two reasons: first, students of elementary-school age do not seize the finer grammatical distinctions—the elementary school is no place for discriminations about which the masters quarrel; second, children enter into the grammatical spirit only by the concrete use of the properly selected sentence copiously illustrated. The technical names of the parts of speech, etc., are frankly used as soon as the need arises; the pupil is not “babied,” so to speak, by calling a *noun* a *name word*.

It is assumed that pupils have studied certain elements of composition that are anticipatory of grammar study—simple rules of punctuation, capitalization, and spelling. These rules are reviewed by way of preparation for the presentation of more advanced rules.

It is felt that pupils profit by setting forth in formal order their analysis of a sentence. Hence the form of *verbal analysis* is frequently given. Graphic presentation makes a special appeal, and hence the verbal analysis is supplemented by forms of *graphic analysis*, a term which is regarded as more desirable than the traditional *diagramming*. While graphic analysis is not the end of grammar study, its inherent interest makes it a valuable accessory. The system here used—an original device—is simple and its rationale so obvious that the structure of the sentence appears at a glance. The distinction between entire subject and entire predicate seen in the simplest sentence is maintained even in the most complex; the lines are either vertical or horizontal, light or heavy, dotted or full; every word is written in the familiar direction and is frequently parsed by its very position in the graph.

The topics in *Interpretation and Appreciation* are introduced to suggest the correct method of approach. It is hoped that the ideas will be carried into similar studies during the reading period.

TO THE TEACHER

1. Please read the PREFACE to this book.
2. Please note the following arrangement of this book:
 - a. The material is divided into **Topics**, by number.
 - b. The usual arrangement of the material under each topic is:
 1. The word **Observe** followed by instances (lettered *a, b, c*, etc.) illustrating the point of the topic.
 2. The word **Note** calling attention to the point.
 3. A **RULE** or **DEFINITION** if one has been developed.
 4. Exercises, numbered consecutively throughout the topic, but grouped under A, B, C, etc. Unless otherwise specified, the directions to pupils apply to the exercises that immediately follow.
 5. An **Example**, illustrating the exercise, if one is needed.
 6. An illustration of VERBAL (oral or written) ANALYSIS, when needed.
 7. An illustration of GRAPHIC ANALYSIS, when needed.
 8. **SUPPLEMENTARY** exercises which may be used in a variety of ways.
 - a. When a class is working through the regular exercises there will ordinarily be a number of pupils who proceed faster than the average; when they finish the regular exercises they may continue to the SUPPLEMENTARY and work as many of these as possible while the rest of the class is finishing the regular work.

- b.* At the opening or close of a lesson the teacher will probably have a rapid review of some preceding lesson. This may be expedited by using the Supplementary material given in connection with the topic she wishes to review.
 - c.* For a review extending over a number of topics the class can be taken rapidly over the Supplementary material for each; e.g., "take the first four exercises in each group," or "the odd-numbered exercises," or "the last three exercises."
- 3. Please note that preceding each topic there is often a number in parenthesis. This refers to the page on which the topic was last treated. The number in parenthesis following the topic indicates the page on which the topic is next treated.

c. He	prefers to go fishing.
d. You and I	shall raise garden vegetables.

Note that each of these lines is a sentence.

Note that each sentence is a statement.

DEFINITION: A sentence is declarative when it makes a statement.

ANALYSIS

Note that the vertical line divides each sentence into two parts.

Note that the left side contains the topic of the sentence. It is called the *entire subject*.

Note that the right side contains what is said of the subject. It is called the *entire predicate*.

Note, too, that the subject does not make a sentence without the predicate, and that the predicate does not make a sentence without the subject.

In other words, every sentence is composed of two necessary parts: the *subject* and the *predicate*.

When we separate the parts that compose a sentence, we analyze the sentence, and what we do is called *analysis*.

VERBAL ANALYSIS

When we analyze a sentence by saying or writing its parts we are making a *verbal analysis*.

A. Analyze:

Example:

Garfield and Arthur were elected in 1880.

I. *Garfield and Arthur were elected in 1880.*

II. Declarative sentence.

III. Entire subject: *Garfield and Arthur.*

IV. Entire predicate: *were elected in 1880.*

| 19. I can swim now. | 29. Longfellow wrote pretty poems. |
| 20. We learned to swim. | 30. He wrote "The Children's Hour." |

GRAPHIC ANALYSIS

A shorter way of analyzing a sentence is to write the words forming the entire subject on the left of a heavy vertical line and the words of the entire predicate on the right of the line. This is called *graphic analysis*.

B. Analyze graphically each sentence in Exercise A:

Example:

Garfield and Arthur were elected in 1880.

Garfield and Arthur | were elected in 1880.

(Care must be taken to make the line between the entire subject and the entire predicate a heavy one, as a different meaning will later be given to the light line.)

Many sentences are suggested by the picture on the opposite page.

C. To the entire subject add an entire predicate:

Example:

This beautiful picture

This beautiful picture shows a holiday in the park.

- | | |

| 35. Everybody in the park | 41. The cannon in the rear |
| 36. The flag in the distance | 42. A boy with a bicycle |

D. To the entire predicate add an entire subject:

43. is covered with new grass.
44. make the park look like a flower-garden.
45. floats gloriously in the breeze.

<i>coat</i>	<i>glove</i>	<i>paper</i>	<i>killie</i>	<i>roof</i>	<i>sieve</i>
<i>lace</i>	<i>muff</i>	<i>pencil</i>	<i>collar</i>	<i>cliff</i>	<i>tough</i>

Note that each of these words is the name of something. Such a word is called a *noun*.

DEFINITION: A word is a noun when it is used as the name of something.

Spell the plural of each of the above nouns. (If you are not sure of the spelling, look up the word in the dictionary.)

Note that each of these nouns forms its plural by adding *s*.

WORD RULE 1: A noun usually forms its plural by adding *s* to the singular.

Spell the plural:

<i>dress</i>	<i>mass</i>	<i>catch</i>	<i>flash</i>	<i>box</i>	<i>fox</i>
<i>miss</i>	<i>pass</i>	<i>scratch</i>	<i>lynx</i>	<i>tax</i>	<i>fez</i>

Note that each of these nouns forms its plural by adding *es* to the singular.

WORD RULE 2: A noun ending in *s*, *x*, *z*, *sh*, or *ch* (soft) forms its plural by adding *es* to the singular.

Spell the plural:

<i>fly</i>	<i>dairy</i>	<i>ally</i>	<i>army</i>	<i>colony</i>
<i>sty</i>	<i>ferry</i>	<i>bunny</i>	<i>berry</i>	<i>history</i>

Note that each of these nouns ends in *y*. **Note**, too, that in every case the letter before the *y* is a consonant. **Note** that each noun forms its plural by changing the *y* into *i* and adding *es*.

WORD RULE 3: A noun ending in *y* preceded by a consonant forms its plural by changing the *y* to *i* and adding *es*.

Spell the plural:

<i>boy</i>	<i>key</i>	<i>tray</i>	<i>chimney</i>
<i>toy</i>	<i>monkey</i>	<i>buoy</i>	<i>journey</i>
<i>bay</i>	<i>donkey</i>	<i>jersey</i>	<i>quay</i>

Note that each of these nouns ends in *y* but that the preceding letter is a vowel.

Spell the plural:

<i>loaf</i>	<i>wife</i>	<i>thief</i>	<i>half</i>
<i>shelf</i>	<i>calf</i>	<i>knife</i>	<i>wolf</i>
<i>life</i>	<i>self</i>	<i>leaf</i>	<i>wharf</i>

Note that each of these nouns ends in *f* or *fe*.

Note that each noun forms its plural by changing the *f* or *fe* into *v* and adding *es*.

WORD RULE 4: A noun ending in ***f*** or ***fe*** forms its plural by changing the ending into ***v*** and adding ***es***.

(Exceptions are: *hoof*, *proof*, *chief*, *scarf*, *fife*, *café*.)

Spell the plural:

<i>potato</i>	<i>hero</i>	<i>cargo</i>	<i>motto</i>

<i>gross</i>	<i>gross</i>	<i>Mr.</i>	<i>Messrs.</i>
<i>die</i>	<i>dice</i>	<i>louse</i>	<i>lice</i>
<i>deer</i>	<i>deer</i>	<i>salmon</i>	<i>salmon</i>

Note that each of these nouns forms its plural without regard to any of the rules—its plural is irregular.

Note that *don't* is a contraction for two words, *do not*. It should not be used as a contraction for anything else, for instance, *does not*.

Note that the contraction for *does not* is *doesn't*.

A. Replace the dash with the proper contraction—*don't* or *doesn't*:

Example:

Aeroplanes _____ travel on tracks.

PHOEBE FLOOD

In Rexford, a little town of the Far West, lived a wood-cutter and his little daughter,—Phoebe Flood,—an orphan since her sixth year. Their home was a one-story cottage set back a bit from Fremont Road. Near by stood a towering willow,—a hundred years old, if a day,—to the shades of which the children of the town flocked as city children do to the park.

Phoebe was a girl sensible beyond her years and blessed with charms at which Nature is wont to smile. Her willow was the first to show catkins; her violets, roses, and lilies came in hosts early, and stayed late, dispensing fragrance in profusion.

The town children loved Phoebe. She knew many games and would amuse her little friends hours at a time. John Flood, her father, worked hard with the wood-cutters making a clearing two miles up Stagg Hill. There were cold days, too, for these choppers. The winters were so severe that at times the county school was closed. It was during these spells that brave Phoebe would prepare a hot luncheon and hasten with it to Stagg Hill to surprise her father. Things went on happily until one day during a sudden gale, a heavy pine tree fell, crushing two of the men.

Fifteen years had passed when the first railway to Rexford was opened. All Rexford was astir. The official train having aboard the state dignitaries, the Governor, the Lieutenant Governor, the Secretary of State, and others, arrived at noon amid the thundering salutes of the townsmen. They were paying tribute to the lady in the company of Governor Brewster, who was none other than their Phoebe!

Phoebe had become the First Lady of the State.

Observe:

- a. *Clifford has brushed his teeth.*
b. *Has Clifford brushed his teeth?*
c. *Brush your teeth.*
d. *Lend me your book, please.*

Note that sentence *a* makes a statement; it is therefore a declarative sentence.

Note that sentence *b* asks a question; it is therefore an interrogative sentence.

Note that sentence *c*, *Brush your teeth.*, is neither a statement nor a question; it is neither declarative nor interrogative. It is a *command*. It is therefore called an *imperative* sentence.

Note that sentence *d*, *Lend me your book, please.*, is neither a statement nor a question. It is a *request*. A sentence that expresses a request is also an imperative sentence.

DEFINITION: A sentence is imperative when it expresses a command or a request.

You are now ready to state Rule 1 as follows:

PUNCTUATION RULE 1: A period is used at the end of every declarative and every imperative sentence.

VERBAL ANALYSIS

C. Analyze:

Example:

Brush your teeth.

(Note that this is an imperative sentence. It is intended for the person to whom it is addressed.)

(Note that the person addressed is the subject of the sentence. Since his name may not be expressed, the word *you*, understood, stands for the name, and serves for the entire subject.)

- I. *Brush your teeth.*
- II. Imperative sentence.
- III. Entire subject: *You* (understood).
- IV. Entire predicate: *Brush your teeth.*

- | | |

GINGER NEVER LOST HIS PLUCK

I am now the property of Mr. Eggleston? Indeed! And I heard you say to Morgan this morning that he was hitching me up for the last time.

— 15.00.1 —

In my old age and blindness I am to leave my home to be turned over to the raw hands of strangers. Is this the reward of thirty years of service? Have you forgotten so soon the innocent days of your youth? Then you were the sunshine of Sunnybrook Vale, and I your unfailing pal. "The apple of your eye," your mother used to call me. Have you forgotten our frolics in the meadows when you were just Jimmie, and your sisters Frankie, Tessie, Mollie, and Jane? And those merry sleighing parties! Can you not hear my sleighbells in the memories of trips to Plainthorpe—"dashing through the snow"? Do you turn me out because I am blind? Fie! Your father blushes in his grave.

Do not pat this old cheek, your touch is cold. Take off your saddle from my back, it chafes me now. Go from me. I hear the voice of good Mother Earth. Ah! She is more mindful of faithful service. She will lead me over the blue fields into the elysian pasture where the turf is ever green, the fountain ever fresh, and friendship everlasting.

(15) **Topic 16. WORD STUDY: The Suffix.** (64)

Observe:

a. bat	<u>bat</u> ting	<u>bat</u> ted	<u>bat</u> ter	c. fur	<u>fur</u> ry
b. dig	<u>dig</u> ging	<u>dig</u> ged	<u>dig</u> ger	d. grit	<u>grit</u> ty

Note that *ing*, *ed*, *er*, *y*, are endings that are often *added to* words in order to change slightly their meaning. They are called *suffixes*.

Note that *bat*, *dig*, *fur*, *grit*, are words of one syllable ending in a single consonant. Note that when the suffix *ing*, *ed*, *er*, or *y*, is added to them, the consonant is doubled.

WORD RULE 8: A word of one syllable ending in a single consonant preceded by a single vowel doubles that consonant before adding a suffix beginning with a vowel.

A. Add the suffix *ing*, *ed*, *er*, or *y*, as indicated:

<i>ing</i>	<i>ed</i>	<i>er</i>	<i>y</i>
1. hem	9. skip	17. thin	25. sun
2. fit	10. pet	18. rub	26. star
3. hum	11. jog	19. clap	27. wit

Observe:

a. <i>begin</i>	<i>beginner</i>	c. <i>transfer</i>	<i>transferred</i>
b. <i>regret</i>	<i>regretting</i>	d. <i>compel</i>	<i>compelled</i>

Note that *begin*, *regret*, *transfer*, and *compel* are words of more than one syllable accented on the last syllable; that they end in a single consonant preceded by a single vowel; that they double the last letter when a suffix is added.

WORD RULE 9: A word of more than one syllable accented on the last syllable ending in a single consonant preceded by a single vowel doubles the final consonant before a suffix beginning with a vowel.

B. Add the suffix *ed*, *er*, or *ing*, as indicated:

<i>ed</i>	<i>er</i>	<i>ing</i>
33. permit	38. prefer	43. excel
34. rebel	39. propel	44. commit
35. entrap	40. confer	45. upset
36. overlap	41. control	46. forget
37. occur	42. refit	47. forbid

Observe:

a. <i>wire</i>	<i>wiring</i>	<i>wiry</i>	d. <i>care</i>	<i>caring</i>	<i>careless</i>
b. <i>tame</i>	<i>taming</i>	<i>tamer</i>	e. <i>shame</i>	<i>shaming</i>	<i>shameful</i>
c. <i>like</i>	<i>liking</i>	<i>likely</i>	f. <i>time</i>	<i>timing</i>	<i>timely</i>

Note that *wire*, *tame*, *like*, *care*, *shame*, and *time* are words ending in silent *e*; that *ing*, *y*, *less*, *ful*, *ly*, and *ment* are suffixes beginning with either a vowel or a consonant.

Note that where the suffix with the initial vowel is joined to the word the final *e* is dropped.

Note that where the suffix with the initial consonant is joined to the word the final *e* is retained.

WORD RULE 10: A word ending in silent *e* retains the *e* before a suffix beginning with a consonant and drops the *e* before a suffix beginning with a vowel.

(Exceptions are *due*, *duly*; *true*, *truly*; *awe*, *awful*; *dye*, *dyeing*. When in doubt consult your dictionary.)

C. Join the word and the suffix, retaining or omitting the final *e* according to Rule 10:

d. <i>fly</i>	<i>flier</i>	<i>flies</i>	<i>flying</i>
e. <i>buy</i>	<i>buyer</i>	<i>buys</i>	<i>buying</i>

Note that *reply*, *carry*, *copy*, and *fly* end in *y* preceded by a consonant, and that they change the *y* to *i* on the addition of *ed* and *es*. **Note** that *buy* ends in *y* preceded by a vowel, and undergoes no change on the addition of a suffix.

Note that in all five words *ing* is added without changing the *y* to *i*.

WORD RULE 11: A word ending in **y** preceded by a consonant changes **y** to **i** before a suffix other than **ing**; words ending in **y** preceded by a vowel retain the **y**.

D. Join the word and the suffix, changing *y* to *i* according to Rule 11:

87. cry (er)	95. dry (ed)	103. dye (es)
88. cry (es)	96. dry (er)	104. dye (er)

93. tiny (er)	101. defy (ing)	109. apply (es)

Topic 17. THE VERB. (47)

Observe:

- a. *Very high mountains stop the winds.*
- b. *Very high stop the winds.*

Note that *a* is a sentence and that the entire subject is *very high mountains*. **Note** that *b* is the same sentence with one word, *mountains*, of the entire subject, missing. **Note** that when this word is omitted the entire subject is destroyed, and there is no sentence.

Every entire subject contains one word that cannot be omitted without destroying the sentence; this word is the *subject word*. In imperative sentences the subject word is always *you* understood.

Observe:

- c. *Very high mountains the winds.*

Note that *c* is the sentence *a* with one word, *stop*, of the entire predicate, missing. **Note** that when this word is omitted the entire predicate is destroyed, and there is no sentence.

Every entire predicate contains one word that cannot be omitted without destroying the sentence; this word is the *predicate verb*, or, we may say merely, the *verb*.

It is evident that every sentence must contain both a *subject word* and a *verb*.

DEFINITION*: A word is a verb when it is the word that cannot be omitted from the predicate without destroying it.

A. Name the subject word and the predicate verb:

- | | |
|--------------------------|--------------------------------|

| 2. Leaves rustle softly. | 6. The tanner tans. |
| 3. Bombs explode. | 7. The dyer dyes. |

* This definition is replaced in Book II by one more complete.

| 9. The maid launders. | 13. Thank your host. |
| 10. The officer patrols watchfully. | 14. Think fast. |

GRAPHIC ANALYSIS

C. Make a graphic analysis of the first ten of the sentences in Exercise A:

(45) Topic 18. THE VERB: Action. (58)

Observe:

a. Raise your hat.

b. I raised mine.

c. Did you?

Note that in each sentence the predicate verb shows the subject as *doing* something at some time; that is, *raise*, *raised*, and *did* show action done by the subject.

Note that all the verbs in Topic 17 represent the subject as *doing* something at some time.

Therefore predicate verbs may show *action*.

Observe how I may *act* with regard to a boat:

I may *sail* it, *steer* it, *row* it, *stop* it, *tilt* it, *shake* it, *upset* it, *land* it, *anchor* it, *repair* it, *paint* it, etc. All the italicized words are verbs, and all show action.

Diogenes, one of the great men of Greece, lived for a time in a tub on a cape in southern Europe. Read what Rabelais says he did with his tub before he descended from the cape:

"There, I say in great excitement, did he *turn* it, *veer* it, *wheel* it, *frisk* it, *jumble* it, *shuffle* it, *huddle* it, *tumble* it, *jolt* it, *jostle* it, *overthrow* it, *invert* it, *overturn* it, *beat* it, *bump* it, *batter* it, *knock* it, *push* it, *jerk* it, *shock* it, *shake* it, *toss* it, *throw* it, *tap* it, *sound* it, *stop* it, *unbung* it, *close* it. And then in mighty bustle he *mounted* it, *notched* it, *decked* it, *adorned* it, *trimmed* it, *garnished* it, *bored* it, *rumbled* it, *slid* it down the hill, and *threw* it from the height of the cape."

 4. Say what the ocean, the rain, the sun, the frost, *can do*.
 5. Say what *can be done* to a clock, to a house, to a garden.

B. Replace the dash with a word that tells the action the animal or the thing may do:

The following are some of the words that may be used, but note that they refer to sounds only:

*caw low grunt bleat bellow flap grit howl hum bray
 mew bark quack rear clatter chatter screech talk sing gobble*

Examples:

- | | | | |
|----------------|---------------------|------------------|--------------------|
| pigeons _____ | <i>pigeons coo;</i> | donkeys _____ | <i>donkeys run</i> |
| 6. dogs _____ | 11. crows _____ | 16. hoofs _____ | 21. turkeys _____ |

THE MISSISSIPPI RIVER

The Mississippi River rises in Lake Glazier near Lake Itasca, Minnesota, and flows into the Gulf of Mexico. It is the most important river in North America and, with the Missouri, it is the largest river in the world. In its upper course it has many rapids, and passes through several beautiful lakes. About four hundred miles from its source it flows over a precipice eighteen feet high. This is called the Falls of St. Anthony. Here navigation begins. Between the Falls and the mouth of the Missouri are many sandbanks, which the river is forming and washing away. These banks often hinder navigation. Frequently trees washed down by the river are caught

by their roots and lie with their tops pointing down stream. These are called "sawyers." They are dangerous; for, in the dark, boats have run into them and have sunk.

The Lower Mississippi is bordered by wide swampy plains which often are overflowed when the river rises in the spring. As these lands are very fertile many fine plantations have been made on them. To protect the fields the people have made walls along the river banks. They call these levees. Near its outlet the river breaks up into several channels between which are low, sandy, and swampy lands. They are called the delta of the Mississippi. Here are bars of sand and mud which often stop navigation. To prevent the river from being blocked altogether Captain Eads constructed jetties at one of its mouths. These jetties are two walls, one on each side of the channel. A strong current washes the mud through these walls and leaves the passage clear.

CLYDE AND CLAUDE

Toward sundown as the lake breezes were gently lifting the July heats from a little mining town of northern Illinois, the settlers were suddenly aroused by tenor music breaking forth from the wooded hills. Men of the shaft and forge burst from their crude quarters, munching what was still left of their evening meal, and filled Main Street as fast as if an airship had unexpectedly landed among them.

Some speedily fell under the spell of that angelic voice; others were plainly disturbed by the words of the song. It was the "Old Folks at Home" the boy was singing.

To this prosaic people whose only song was the monotonous line of the bobwhite, the whippoorwill, or the katydid, the experience was like a boon from the sky. Ordinarily, people will applaud what pleases them. Not so here. A hush followed upon the music. Clyde and Claude—Clyde of the beautiful tenor voice, Claude with the stringed instrument—found themselves in the centre of four hundred brawny miners who seemed completely spell-bound.

The two strangers were poor students from Maine. To meet their expenses at college they were touring the states during the summer, harvesting from their musical gifts, and incidentally taking a good look at the world at large. They remained with the miners all week, entertaining them every evening most generously. When they finally departed, they were laden down with the blessings of these good people. Also, they took with them money that put them both through another college year.

10. Ceres' help was needed again, and _____ made the first laws for property-owners.

B. In the selection the pronouns are underscored. In each instance tell the word for which the pronoun stands:

SPIDERS

Spiders are flesh-eaters. Their mouths are therefore made for biting; though in attacking their prey they do not eat the bodies but suck from them the juices they contain. Spiders are armed with terrible jaws consisting of two sharp-pointed hooked blades which have saw-like edges. When a spider bites with these blades their points shut together in the wound, and at the same time there is injected a colorless poison which kills insects. The bite of a spider on the back of a man's hand has been known to cause his whole arm to swell enormously. We are not sure, however, that there are spiders in the United States whose bite would kill a healthy man.

Most spiders spin webs; but while some live in them, others use them only as traps to catch their prey. They seldom move from place to place without spinning a line after them. By its use they are able to drop safely from any height, and, while hanging by it, are often swung by the wind across wide spaces without any trouble on their part except to let out the thread. Inside the spider's body are bags filled with a gummy substance, out of which the threads are drawn and constructed into its web. When an insect touches one of these sticky threads it is held fast, and its struggles only entangle it the more. As soon as the spider feels any movement it runs out and seizes its victim.

C. The pronoun *I* appears frequently in this letter. Name the verb of which it is the subject.

Yodelpup, New Years, 1920

My dear Pal Paul,

Now that I have finished my first week in Yodelpup I shall tell you something of city life. But first, how are all the boys in Piffle? I am thinking of them a thousand times a day. Tell them so. You folks in Piffle don't know anything. You see nothing; you hear nothing: how could you know anything? Think of it! Here am I, hardly a week in Yodelpup and have been in trolley collisions twice, in automobile wrecks three times, and once a witness when I was mixed up with two discourteous dogs. The "Sunrise News" published my picture this morning.

But while I am fast becoming urbanized, I feel there is much I can learn. I hear from the police that the first fifty years are the hardest.

At present I am boarding with a Mrs. Snappersnitch, a kind old lady whom I much esteem. I should respect her much more if she would not ask so many questions. I should say the same of the boarders, who for some reason or other are greatly concerned about the wooden shoes under my bed. But I like the board. By the way, one of our puddings has been renamed "piffle"—as a compliment to me. However, I thank the stars and Mr. Slater for my studies in English; for when I join the staff of the "Sunrise News," which I expect to do very shortly, I shall surely turn the laugh on these clever boarders.

Until you hear from me again, and after, too, believe that I am

Your faithful chum,

Click.

Penn often met the Indians and visited them in their cabins; and the rulers of the colony and the natives kept their faith with one another.

It was the law of kindness and the love of freedom, not only for his Quaker friends, but for all men, which guided William Penn in planting the colony that became in time the great state of Pennsylvania.—*Gordy*.

EXTRADITION

All day long the snow had been falling steadily, in big fluffy flakes. The heavy train ploughed through dense pine-clad ravines, beside torrents buried far below the snow, under sheds into whose inky blackness the engine plunged, as into the bowels of the earth, across vibrating trestles, and up grades that seemed never ending, where the driving wheels slipped and ground ineffectually; then clutched the sanded rails, and slowly forged onward.

For two days it had been thus, and from the windows only the gently falling, ever falling snow met the eye. Heavy clouds shrouded the shoulders of the mountains, and the gorges between them were choked with mist. And onward, upward, always upward groaned the train.

The strain of the wheels suddenly relaxed; and it seemed as if the whole train sighed with relief. Ahead the engine gave a succession

of quick snorts, as if rejoicing at once more reaching a level. The train gathered headway.

"She is over the divide," announced the conductor, . . . "Now Jim can let her run."

"What do you call a divide?" asked Peggy.

"The Lower Kootenay," he answered. "Oh, it's great here in summer. Finest thing in Canada, in my opinion."

"In Canada!" exclaimed Dockbridge, with a start. "What do you mean? Are we in Canada?"

"You have been in Canada since three o'clock," was the reply; "we cross the lower left hand corner of Alberta—look at the map there in the folder. After making the divide we drop right back into Montana. They couldn't cross the Rockies at this point without leaving the States for a few miles."—*Arthur Train*.

C. The underscored words are adjectives and pronouns. In each case, tell which the word is:

In the early days of our history, when the soil was new and rich, we were not compelled to use large amounts of manure and fertilizers. Yet our history speaks of a certain Indian who came into one of the New England colonies and showed the first settlers how, by putting a fish in each hill of corn, they could obtain larger yields.

If people in those days, with new and fertile soils, could use manures profitably, how much more ought we to use them in our time, when soils have lost quality, and when the plant food in the soil has been exhausted by years and years of cropping.

To sell, year after year, all produce grown on land is a sure way to ruin it. If the richest land is planted every year in corn, and no

stable or farmyard manure or other fertilizer returned to the soil, the land so treated will soon become too poor to yield any crop. If, however, clover or alfalfa or corn or cotton-seed meal is fed to stock, and the manure from the stock returned to the soil, the land will be kept rich. Hence those farmers who do not sell such raw products as cotton, corn, wheat, oats and clover, but who market articles made from these raw products, find it easier to keep their land fertile.

If we wish to keep up the fertility of our lands we should not allow anything to be lost from our farms. All the manures, straw, roots, stubble, healthy vines—in fact, everything decomposable—should be plowed under or used as a top-dressing. Especial care should be taken in storing manure. It should be watchfully protected from sun and rain. If a farmer has no shed under which to keep his manure, he should scatter it on his fields as fast as it is made.

Observe:

Hay is light ; feathers are lighter than hay ; air is the lightest of the three.

Wood is heavy ; stone is heavier than wood ; iron is the heaviest of the three.

Note that *light* not only describes *hay*, *feathers*, and *air*. It also compares them, by changing the form of the word.

Note that *heavy* not only describes *wood*, *stone*, and *iron*. It also compares them, by changing the form of the word.

Note that when two things are compared the adjective ends in *er*, and that when three things are compared the adjective ends in *est*.

This changing of the form of the adjective is *comparison*. In comparison, the first form is called the *positive*; the second, the *comparative*; the third, the *superlative*.

Observe the comparison of these adjectives:

a.	<i>smart</i>	<i>smarter</i>	<i>smartest</i>
b.	<i>old</i>	<i>older</i>	<i>oldest</i>
c.	<i>thin</i>	<i>thinner</i>	<i>thinnest</i>

e.	<i>slim</i>	<i>slimmer</i>	<i>slimmest</i>

D. Each underscored word is a subject word. Name its predicate verb.

(See picture on opposite page.)

Mt. Rainier, which rises to a height of almost fifteen thousand feet, is beset with peril for the most daring mountain climber. It has many dangerous ice cracks. As Mt. Rainier is a volcano, and though it has not been active in two hundred years, it is known to have occasional minor eruptions that have broken up its side and have made deep jagged rents. For a mountaineer to slip into such a crack might not be a dangerous experience; but if the crevasse happens to be from fifty to a hundred feet deep, it is a different story. Mountain climbers are equipped with Alpine ropes, the cordage of which is almost as strong as steel. If a climber should lose his footing on the edge of a hundred foot chasm he need be none the worse. His companions would merely reinforce their own foothold by striking those long sticks, or alpinestocks, well into the ice, then pull him up again to safety. But walls of ice are deceiving; a misstep is made in the twinkling of an eye, and the rope is apt to be cut on the jagged fissures, hence a fall on Mt. Rainier is in nearly every instance fatal.

Topic 31. THE PREDICATE NOMINATIVE.

Observe:

- a. *The lizard eats grubs.*
- b. *Smith raised cabbages.*
- c. *The boys will visit him.*

Note that each verb has an object word.

Note that each verb is an action verb.

Not all action verbs have object words; but *only* action verbs have object words.

Observe:

- d. *The lizard is a reptile.*
- e. *Smith was a farmer.*
- f. *The boys will be soldiers.*

Note that each verb is a being verb.

Note that the nouns *reptile*, *farmer*, *soldiers* have the same position in the sentence as the object words in *a*, *b*, and *c*. But they do not receive an action expressed by the verb; therefore they are not object words. The noun *reptile* is another name for the subject *lizard*; the noun *farmer* is another name for the subject *Smith*; the noun *soldiers* is another name for the subject *boys*. In each case the word in the entire predicate *renames* the subject. It is called the *predicate nominative*.

When a noun in a predicate having a *being* verb is used to rename the subject word it is called the *predicate nominative*.

A. Name the predicate nominative:

1. The potato is a tuber.
2. I am an American citizen.
3. Diaz was a Mexican ruler.
4. John is your brother.
5. Charles may be a good salesman.
6. The mustard-seed becomes a tree.

8. These boys have been my pupils.
9. Shall we be playmates?
10. Be my partner.
11. Will next year be a leap-year?
12. Florence has always been my friend.
13. Is the pumpkin a squash?
14. All two-footed animals are bipeds.
15. John Smith was the first president of the Virginia colony.
16. Some of the colonists were shiftless people.
17. The Indians and the settlers became bitter enemies.
18. Penn and the Indians were always friends.
19. Philadelphia was once the capital of the United States.
20. Since 1800 Washington has been the capital of the United States.

VERBAL ANALYSIS

- VI. Predicate verb: *is.*
- VII. Predicate nominative: *reptile.*

GRAPHIC ANALYSIS

C. Analyze graphically the first fourteen sentences in Exercise A:

Example:

(Note that the predicate nominative, because it renames the subject word, is placed on the same level with it.)

| e. <i>Arnold was a traitor.</i> | f. <i>Arnold was <u>treacherous</u>.</i> |
| g. <i>Jane is a bright pupil.</i> | h. <i>Jane is <u>bright</u>.</i> |

Note that *trees*, *student*, *traitor*, and *pupil* are predicate nominatives, that is, they are nouns in the predicate that rename the subject word.

Note that *tall*, *studious*, *treacherous*, and *bright* are found in the predicate, like predicate nominatives, and that they follow a being verb. But they are not nouns; and they do not rename the subjects *Elms*, *Donald*, *Arnold*, and *Jane*. They are *adjectives* and describe the subjects.

An adjective that follows a being verb and describes the subject word is called a *predicate adjective*.

A. Name the predicate adjective:

- | | |

- a. *Tanners make leather.*
- b. *Grass smells sweet.*
- c. *Harry became chairman.*
- d. *Your American tanners usually make the best leather.*
- e. *The autumn meadow grass always smells very sweet.*
- f. *My cousin Harry then became our first chairman.*

Note that subject words, predicate verbs, object words, predicate nominatives, and predicate adjectives may be unaccompanied by other words, as in *a*, *b*, and *c*.

Note that subject words, predicate verbs, object words, predicate nominatives, and predicate adjectives may be accompanied by other words, either to make the sense clearer or the meaning fuller, as in sentences *d*, *e*, and *f*. Thus *Your* and *American* go with *tanners*; they tell *what* tanners. *Usually* goes with *make*; it tells in a general way *when*. *The* and *best* go with *leather*; they tell *which* or *what* kind. The same may be seen in sentences *e* and *f*.

A word that adds to the meaning of another word or makes the sense clearer is called a *modifier* of the other word.

A. Replace the dashes with appropriate modifiers:

E. Tell what question the underscored adverb answers and the verb it modifies:

“Not a cloud was now in the sky, and the wind was deadly still. The sun came and gently touched the plains and hilltops with the light that makes all things glad. Here and there a jack-rabbit scurried away, often followed by a pack of dogs, and sometimes though not often, they were overtaken and cruelly devoured on the spot. Bands of graceful antelopes bounded out of our way, stopping on a knoll, eagerly watching the strange procession with wondering eyes, and once we saw a dust-cloud raised by a slowly moving herd of buffalo, in the distance.

So the day wore on, the scene constantly changing as we travelled. Wolves and coyotes looked at us savagely from almost every knoll and hilltop; and sage-hens sneaked to cover among the sage-brush, scarcely ten feet away from our ponies.”

(96) Topic 35. THE ADVERB: As Modifier of an Adjective. (105)

Observe:

- a. *The Andes and the Rockies are high mountains.*
 b. *The Andes and the Rockies are very high mountains.*

Note that *high* is an adjective describing mountains.

Note that *very*, sentence *b*, tells something about *how* high these mountains are. There is a difference between mountains that are *high* and those that are *very high*. The difference is suggested in the use of *very*; in other words, *very* modifies the meaning of the adjective *high*.

A word that modifies the meaning of an adjective is an *adverb*.

THE LAST WORD OF TOBIAS TO HIS SON

Among the many thousands who lingered in the Jewish captivity was a God-fearing man named Tobias. From his youth this man kept the commandments, and avoided the society of the wicked. He spent much of his time in consoling his fellow captives, and, by his charities, helping to relieve their wants. To feed the hungry, to clothe the naked, and in the night to bury the dead was his constant care. It was after one of these errands of mercy one night that he accidentally lost the sight of both eyes. But he bore his new affliction with utmost patience.

Grown old, and feeling that he had not many days to live, he called his son, young Tobias, to him that he might give him some advice.

"When I die," said he, "fail not to bury me. Honor thy mother, nor forget what she suffered for thee. When she dies, bury her by my side. Fear God, and never sin; keep pride from your heart, and seek the counsel of the wise man. Do unto another what you would wish him to do to you. Give alms according to your means; if you have much, give much; if little, give little; but give with a good heart. We are poor, it is true; but if we fear God and avoid sin we shall receive much."

When young Tobias heard his good old father speak in this manner he fell upon his knees and, weeping, promised to do all he had been commanded to do.

(88) Topic 39. THE VERB: The Auxiliary. (115)

Observe:

- a. *The wolf devours its prey.*
- b. *The wolf is devouring its prey.*
- c. *The wolf was devouring its prey.*

Note that in all sentences the same verb *devour* is used.

Note that in *a*, it is not clear as to whether the action of *devours* is something that continues or not. But in *b* and *c*, with the suffix *ing*, the verb does make it clear that the action is a continuing one.

Note that in *b*, *is* helps the verb by showing that the *devouring* is taking place now; that is, in the present.

Note that in *c*, *was* helps the verb by showing that the *devouring* was taking place in the past.

Observe:

- d. *The wolf devoured its prey.*
- e. *The wolf did devour its prey.*

Note that in *d*, with the suffix *ed*, the verb shows that the action is finished. The *devouring* took place in the past.

Note that in *e*, the same thought is expressed by the help of the word *did*.

Observe:

- f. *The wolf has devoured its prey.*
- g. *The wolf had devoured its prey before we came.*

Note that in both sentences *devoured* shows that the action is finished.

Note that in *f*, *has* helps *devour* by showing that the time when the action is finished is still in the present.

Note that in *g*, *had* helps *devour* by showing that the time when the action is finished was in the past—that is, *before we came*.

Note that *is*, *was*, *did*, *has*, and *had* are all verbs, but that here they all *help* the verb *devour*. They are called *auxiliary* verbs.

A. Change the meaning of the sentence by using the various auxiliaries, *is*, *are*, *do*, *does*, *was*, *were*, *did*, *has*, *have*, *will* :

THROUGH THE IVORY GATE

As he stood on the farther side of the tree where the little ghost had faded from him, at his feet lay, open and conspicuous, a fresh deep hole. He looked down absent-mindedly. Some animal—a dog, a rabbit—had scratched far into the earth. A bar of sunlight struck a golden arm, through the branches above, and as he gazed at the upturned brown dirt the rays reached into the hollow, and touched a square corner, a rusty edge of tin. In a second the young fellow was down on his knees digging as if for his life, and in less than five minutes he had loosened the earth which had guarded it so many years, and staggering with it to his feet had lifted to the bench a heavy tin box. In its lock was the key, and dangling from it a long bit of colored silk.

He opened the box with the little key; it turned scrapingly, and the ribbon crumbled in his fingers, its long duty done. Then as he tilted

the heavy weight, the double eagles packed loosely, slipped against each other, with a soft clink of sliding metal. The young man stared at the mass of golden pieces as if he could not trust his eyesight; he half thought even then that he dreamed it. With a quick memory of the mortgage he began to count. It was all there—ten thousand dollars in gold!

He lifted his head and gazed at the quiet woodland and the open shadow-work of the bare branches, the fields beyond lying in the calm sunlit rest of a Southern winter. Then he put his hand deep into the gold pieces and drew a long breath. It was impossible to believe, but it was true. The lost treasure was found.—*M. R. S. Andrews.*

THE STAYING POWER OF SIR RHOAN

We now drove on in silence, our horse actually arching his neck as he thumped through the snow. Drifts had begun to form across the road, but through these he bravely plunged.

"Stayin' power is what we want, Doctor," exclaimed Uncle Beamish; "where would your fast trotter be in drifts like these, I'd like to know? We got the right horse when we got this one, but I wish we had been goin' this way all the time."

It grew darker and darker but at last we saw not far in front of us a light.

"That beats me," said Uncle Beamish, "I don't remember n'other house so near the road. It can't be we ain't passed Crocker's yit. If we ain't got no further than that, I'm in favor of stoppin'. I am not afraid of a snow-storm but I ain't a fool nuther, and if we haven't got further than Crocker's it will be foolhardy to try to push on through the dark and these big drifts which will be gettin' bigger."

I did not give up so easily. I greatly wished to reach my destination that night. But there were three wills in the party, and one of them belonged to the horse. Before I had any idea of such a thing the animal made a sudden turn, too sudden for safety, passed through a wide gateway, and after a few rapid bounds, which to my surprise I could not restrain, he stopped suddenly.

"Hello!" exclaimed Uncle Beamish, peering forward, "here's a barn door," and he immediately began to throw off the fur robe that covered our knees.

"What are you going to do?" I asked.

"I'm going to open the barn door and let the horse go in," said he, "he seems to want to. I don't know whether this is Crocker's barn or not, it don't look like it, but I may be mistaken."

Topic 48. INTERPRETATION and APPRECIATION.

THE BUSY BEE

How doth the little busy bee
 Improve each shining hour,
 And gather honey all the day
 From every opening flower!

How skilfully she builds her cell!
 How neat she spreads the wax!
 And labors hard to store it well
 With the sweet food she makes.

In works of labor or in skill,
 I should be busy, too;
 For Satan finds some mischief still
 For idle hands to do.

In books, or work, or healthful play,
 Let my first years be past;
 That I may give for every day
 Some good account at last.

Lay up the grain for times of want,
A wise and cautious hoard.

My youth is but a summer's day;
Then like the bee and ant I'll lay
